

Working harder to make us safer and better

Our lunchroom staff has made a number of adjustments to the lunchroom routines in order to provide a safe atmosphere for our students and faculty. Thank you to Mrs. Lynne, Mrs. Tammy, and Mrs. Susan for all of the extra work that you are doing for our students.

Technology in the Classroom

The elementary teachers received a wonderful addition to their classrooms last week as 65” Viewsonic Smart Boards were installed in their classrooms. These interactive boards are intended to enhance and accelerate learning in the classroom and have already created a fun learning environment in every classroom. Teachers received training during In-Service Week and will receive additional training on September 16.

Thank you Mr. James!

Thank you to Mr. James Hayes, who with assistance from Mr. Eric Ahtonen, installed all of the Smartboards in two days. His work was an early Christmas present for all of our teachers and students in the elementary building.
